

Gulf Shield Elastomeric Silk

Product Description

Gulf Shield Elastomeric Silk is based on 100 % pure acrylic water based product, designed to withstand the harassment of gulf weather and to give flexible pleasing Elastomeric coating. It provides fungi and algae growth resistance, anti-carbonation properties, low dirt pick up, crack bridging ability, UV resistance, durable and long lasting coat.

Recommended Usage

To be used as a top coat for interior and exterior surfaces such as concrete, cement, plaster, brick and wood works, mainly to be used for car park and bridges.

Hint

Theoretical spreading rate is a value that depends on solid content and desired dry film thickness by the following equation:

$$\text{Theoretical spreading rate} = \frac{10 \times \text{solid content by volume}}{\text{DFT in microns}}$$
